

Superfile

Superfile is an AI powered file storage and search tool. With the core functionality of the system, users can:

1. **Sign up and log in** to their accounts, create spaces, and manage account settings.
2. **Upload PDF files** (e.g., receipts, warranties, subscriptions, bills, invoices etc.) to their personal cloud storage.
3. **View and manage files** through a simple interface with options to list, download, and delete.
4. **Search documents using natural language**, where the AI understands queries, retrieves relevant information, and presents answers with links to the original documents.
5. **Upgrade via subscription**, unlocking the Pro version of the app through integrated billing.

This ensures a seamless workflow: **authentication → file upload → storage → AI-powered indexing → natural language search → subscription management** — giving users a fully functional, subscription-based AI file assistant.
